To our customers

Statement on corona virus issue - status week 24/2020

Dear Ladies and Gentlemen,

we are pleased that we could stick to our amitious ramp-up plan in all our Tunisian production sites without any interference in the past week as well. Also the infection rates in Tunisia are still on a pleasing low and stable level.

From this week on we can refer to approximately 90% of our production capacity.

We feel reassured in the path we have taken and consider our thoughtful and circumspect approach for our employees, in consequence also for our customers, as the only appropriate to ensure a sustainably stable situation.

Until today we have been able to re-schedule more than half of the resetted orders in order to dissolve the backlog situation as soon as possible. Shortly this process will be concluded.

Please desist from sending any reminders for next maximum 2 weeks. But please do not hesitate to contact us, if you are facing severe difficulties caused by non-supply by Kaschke.

We keep working intensively for helping all customers to greatest possible extent, given that our still limited production capacity and the significant extent of backlogs will allow it.

Yours faithfully

Josef Postert

Prokurist
